SUMMARY

Computer Science Engineering student with hands-on experience in Python backend development, AWS Lambda serverless architecture, REST API design, and AI/ML integration (LLMs, NLP, Prompt Engineering). Built and tested production-oriented applications across cybersecurity, healthcare, and cloud-based domains, backed by a strong foundation in Data Structures, DBMS, and Object-Oriented Programming.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Frameworks / Libraries: Django, FastAPI, React.js, Node.js, Vite, SQLAlchemy, Alembic, RESTful API Development

Cloud & DevOps: AWS Lambda, AWS (Serverless Architecture), Git, GitHub, CI/CD

Databases: PostgreSQL, MySQL

AI / ML: Machine Learning, NLP, Prompt Engineering, LLM Integration, Retrieval-Augmented Generation (RAG), Vector Embeddings & Similarity Search

Testing: API Testing, Unit Testing, Debugging

Core CS: DSA, DBMS, OOP, Operating Systems, Computer Networks, Cybersecurity, HTTP, JSON

WORK EXPERIENCE

Python Serverless Developer Intern, Banao Technologies Pvt Ltd

Feb 2026 – Aug 5, 2026

Bengaluru, India

- Engineered and deployed 30+ AWS Lambda functions in Python, powering scalable serverless REST APIs used across 3 internal services.
- Designed, tested, and debugged 50+ backend API endpoints, writing unit and integration tests that reduced post-deployment defects by an estimated 20%.
- Partnered with a 5-member cross-functional team via Git-based workflows to ship backend features and bug fixes on a bi-weekly release cycle.

Cyber Security Intern, Excerpt Technologies Pvt Ltd

Feb 2023 – Jun 2023

Bengaluru, India

- Built secure OTP-based authentication workflows adopted across the company's login and identity-verification systems.
- Secured core application modules by conducting vulnerability assessments and patching risks.
- Collaborated with the security team to triage and resolve application vulnerabilities during fast-paced sprints

PROJECTS

GreenIntel – Greenhouse Intelligence System | NASA APIs, SMTP, Python, Machine Learning

- Integrated NASA POWER API for real-time environmental analysis and built an ML-based temperature prediction model with automated crop-suitability alerts.
- Reduced manual monitoring effort by an estimated 30% through automated analysis and alerts.

AI-Powered Mental Health Companion and Personal Assistant | React, Node.js, Gemini API, Twilio, SMTP

- Built a full-stack AI application using Gemini API with real-time emotion detection and IoT-based health monitoring.
- Automated personalized wellness reminders through email and SMS for continuous user engagement.

NutriScan – AI Health Companion | Django, Python, REST APIs

- Developed a Django-based nutrition tracker with real-time barcode scanning and interactive data visualization.
- Integrated third-party nutrition APIs to provide instant calorie insights and personalized recommendations.

C2S ChipIN AI Chat Support | React, FastAPI, RAG, PostgreSQL

- Built an AI-powered technical support chatbot using React, FastAPI, PostgreSQL, and RAG with module-aware grounding for EDA tool troubleshooting.
- Developed contextual chat, REST APIs, and support ticket workflows with screenshot attachments, structured responses, and email notifications.

EDUCATION

2023 – 2026 BE in Computer Science and Engineering, **Dr. Ambedkar Institute of Technology** – 84% (CGPA equivalent: 8.4/10)

2020 – 2023 Diploma in Computer Science and Engineering, **Govt. Polytechnic Chintamani** – 86% (CGPA equivalent: 8.6/10)

CERTIFICATIONS

Cybersecurity – **Infosys Springboard**

Introduction to Data Science Job Simulation – **Forage**

GenAI Job Simulation – **Forage**
